EDUCATION

UNIVERSITY OF KABIANGA
Bachelor in Computer Science
2022-2026

A comprehensive program focused on transforming complex problems into functional, high-performance software.

Proven ability to apply theoretical computer science principles to real-world development challenges.

Key Skills: Software Architecture, UI/UX Principles, and Computational Logic.

EXPERIENCE

ICT AUTHORITY - NAKURU | ICT INTERN
MAY- AUGUST 2025

- Incorporated integrated sustainable ICT solutions into regional government systems to improve service delivery.
- Prepared detailed technical documentation and "design drawings" for local network architectures and hardware configurations.
- Managed the implementation of e-government portal updates, ensuring functional and user-friendly digital solutions for citizens.
- Provided technical project management support for high-priority ICT infrastructure rollouts in the Nakuru region

WARDIERE INC. (FREELANCE) | JUNIOR FRONTEND DEVELOPER
JANUARY 2024 - AUGUST 2025

- Transformed complex client ideas into beautiful, functional web interfaces using modern JavaScript frameworks.
- Integrated 2D and 3D UI components into interactive dashboards, enhancing user engagement and visualization.
- Developed responsive, sustainable code architectures that reduced load times and improved cross-browser compatibility.
- Collaborated on creative design solutions for digital advertisements, focusing on unique user experiences.
